THIS DOCUMENT CONTAINS INFORMATION AFFECTING THE NATIONAL DEFENSE
OF THE UNITED STATES. WITHIN THE MEANING OF TITLE 18, SECTIONS 793
AND 794, OF THE U.S. CODE, AS AMENDED. ITS TRANSMISSION OR REVE-
LATION OF ITS CONTENTS TO OR RECEIPT BY AN UNAUTHORIZED PERSON IS
PROHIBITED BY LAW. THE REPRODUCTION OF THIS REPORT IS PROHIBITED.

THIS IS UNEVALUATED INFORMATION

1. The production of photographic paper has been completely discontinued at Agfa-Wolffen. It has been taken over by Kodak Kopenick.
2. There has been no change in the production of film, except that the production of standard film delivered to the Soviet film companies has been reduced by around 20,000 meters monthly, and the production of special film and high sensitivity material has increased. It is estimated that about 200,000 meters of these materials are going to the Soviet Union monthly. A large part is infra-red sensitive film. A large amount of color film is also delivered to the Soviet Union. It is designated as "Sovifilm" but it is Agfa film of various kinds. Production is mainly of three-layer color films of the T and K types, including negative as well as reversible film. The T kind is intended for day-light use, the K kind for artificial light.
